

Protecting Your Home After A Hurricane

We understand that the aftermath of a hurricane or severe flood can be incredibly challenging. As your insurance agency, we want to emphasize the importance of taking immediate steps to protect your property from further damage as required by your insurance policy. After assessing the impact of the storm, please prioritize actions including:

- **Tarp Roofs:** If your roof is damaged, cover it with tarps to prevent water intrusion.
- **Board Up Windows:** Use plywood or other materials to cover broken windows and prevent further damage.
- **Remove Water:** If safe to do so, start removing water from your property using pumps or buckets and dry out home.
- **Conduct Temporary Repairs:** Make any necessary temporary repairs to prevent further damage, like covering holes or securing loose structures.
- **Secure Your Property:** Lock doors and windows to prevent theft. If you need to leave, inform neighbors or local authorities.
- **Document Damage:** Take comprehensive photos and videos of all damage for your records and for insurance claims.
- **Keep Receipts:** Save receipts for any repairs or supplies purchased to mitigate damage, as these may be reimbursable by your insurance.

These proactive measures will not only safeguard your property but also ensure a smoother claims process. If you need assistance in finding a contractor in your area, we recommend visiting the website below:
